ABSTRACT:

This COVID care website aims to provide comprehensive information and resources on COVID-19 care and management. It covers a range of topics including symptoms and diagnosis, prevention and treatment , vaccination information, and community resources. Additionally, the website offers unique features such as telemedicine services and virtual consultations with healthcare professionals. Our goal is to provide accurate and up to date information to help individuals and communities navigate the challenges of

the pandemic. We recognize the importance of staying informed and taking necessary precautions to protect ourselves and our loved ones. This website is an essential resource for anyone seeking reliable information and support during the COVID-19 pandemic. The database storage management system will be implemented using Mysql software. We will be using CSS ,JavaScript ,HTML ,Web 3,Java,Python.
